GREEN & SUSTAINABILITY

SUSTAINABILITY, TRANSPARENCY AND AWARENESS ARE KEYWORDS OF OUR CORPORATE RESPONSIBILITY.

SOSTENIBILITÀ, TRASPARENZA E CONSAPEVOLEZZA SONO LE PAROLE CHIAVE DELLA NOSTRA POLITICA DI CORPORATE RESPONSIBILITY.

CLEAN ENERGY
ENERGIA PULITA

In 2022 we activated the new zero-impact solar photovoltaic system, installed on the roof of our factory. **More than 3,000 panels on 6,000 sqm**. The plant can generate an average of 1,250 KW, equal to 30% of the company's annual needs. The plant cuts CO2 emissions into the environment consistently, **the equivalent of 7,500 planted trees in 5 years**. A small but significant contribution to our planet.

Nel 2022 abbiamo attivato il nuovo impianto fotovoltaico a energia solare a impatto zero, installato sulla copertura dello stabilimento. **Oltre 3.000 pannelli su una superficie di 6.000 m²**. L'impianto è in grado di generare mediamente 1.250 KW, ossia il 30% del fabbisogno energetico annuo dell'azienda. Lo stabilimento diminuisce così le emissioni di CO2 nell'ambiente in maniera considerevole: **il corrispettivo di 7.500 alberi piantati nell'arco di soli 5 anni**. Un piccolo ma significativo contributo per il nostro pianeta.

10 YEARS OF SUSTAINABILITY REPORT
10 ANNI DI BILANCIO DI SOSTENIBILITÀ

Since 2012 we have published the Sustainability Report every year, a report on our performance through numbers and achieved targets, **a concrete proof of our commitment** and attention to sustainable development.

Dal 2012 pubblichiamo ogni anno il Bilancio di sostenibilità, un report delle nostre performance attraverso numeri e obiettivi raggiunti, **testimonianza concreta del nostro impegno** e attenzione verso uno sviluppo sostenibile.

RESPONSIBLE CONSUMPTION
CONSUMO RESPONSABILE

We care about our planet and that is why we set our environmental policy on a responsible consumption and the use of clean and renewable energy sources. **A sustainable and respectful approach to nature** and our territory.

Abbiamo a cuore il nostro pianeta e per questo abbiamo impostato la nostra politica ambientale sul consumo responsabile e sull'utilizzo di fonti energetiche pulite e rinnovabili. **Un approccio sostenibile e rispettoso per la natura** e il nostro territorio.

OUR EFFORTS, EVERY DAY
IL NOSTRO IMPEGNO, TUTTI I GIORNI

Beside monitoring water consumption and purification systems, we use energy-efficient LED lighting elements, twilight lamps throughout the plant and controlled thermostats in every office. We have reduced paper consumption by choosing digital archiving, using recyclable materials and separate waste collection in every room. **This is non-stop progress**.

Oltre al monitoraggio del consumo d'acqua e sistemi di purificazione, impieghiamo elementi di illuminazione LED ad alta efficienza energetica, crepuscolari in tutto lo stabilimento e termostati controllati in ogni ufficio. Abbiamo ridotto il consumo di carta scegliendo l'archiviazione digitale, impiegando materiali riciclabili e operando la raccolta differenziata in ogni ambiente. **Un miglioramento non-stop**.

FACTORY
NATURE meets DESIGN

ITALIAN HEADQUARTERS

In 2001, in 9 months, the new headquarter between Vercelli and Novara was built, amounting to 150,000 square meters - equivalent to more than 20 football fields - of which 19,000 square meters for production. In 2004, the new warehouse was expanded to 13,000 square meters, later still to 25,000 square meters. The building - which includes one of the largest galvanic plants in Europe - **meets all production and warehous requirements, as well as logistics needs**. It is positioned exactly opposite the highway entrance for fast connections to the center of northern Italy.
Developed by the Frigerio Design Group, Slow Architecture is a progressive architecture, living in time and in its context. The parallelism created by the building establishes a geometric correspondence between the Po Valley and the linearity of the façade elevation, which is sensitive to the nuances of the sky and the land through an unprecedented play of colours, with a "screen" of gigantic colored pixels.

Nel 2001, in 9 mesi, viene costruito il nuovo headquarter tra Vercelli e Novara, pari a 150.000 m^2 - equivalenti a oltre 20 campi da calcio - di cui 19.000 m^2 di produzione. Nel 2004 viene ampliato il nuovo magazzino a 13.000 m^2, successivamente ancora a 25.000 m^2. Lo stabilimento - che include uno degli impianti galvanici più grandi d'Europa - **risponde a tutte le esigenze di produzione e stoccaggio, oltre che di logistica**, posizionato esattamente di fronte all'ingresso autostrale per rapidi collegamenti con il cuore nevralgico del Nord Italia.
Sviluppata dal Frigerio Design Group, la Slow Architecture è un'architettura progressiva, che vive nel tempo e nel contesto in cui s'inserisce. Il parallelismo creato dal nuovo edificio instaura una corrispondenza geometrica tra la Pianura Padana e la linearità del prospetto della facciata, sensibile alle sfumature del cielo e del territorio attraverso un inedito gioco cromatico, con uno "schermo" di enormi pixel colorati.

US HEADQUARTERS

In 2020, the new centralized logistics hub Sambonet Paderno in Randolph, New Jersey was opened. **A key distribution hub in North America**, covering over 6.000 square meters, with 40 employees, sales offices, and a state-of-the-art warehouse with more than 15.000 products.

The stoneware gives a rustic and informal tone but can also create an atmosphere with an antique flavor in the most modern environments. Similar to porcelain, it can be used in the oven and in the microwave. Suitable for storing food in the freezer. Avoid thermal shocks. Stoneware retains heat very well and distributes it evenly. Perfect for serving from the oven to the table, keeping food warm during meals. Moreover the water absorption is equal to 0%, a feature that allows to keep the flavors of the food served unchanged. Easy to clean, dishwasher safe.

Lo stoneware regala un tono rustico ed informale, ma può anche creare un'atmosfera dal sapore antico negli ambienti più moderni. Simile alla porcellana, può essere utilizzato in forno e nel microonde. Adatto alla conservazione dei cibi nel congelatore. Evitare shock termici. I pezzi in stoneware trattengono molto bene il calore e lo distribuiscono in modo uniforme. Perfetto per servire dal forno alla tavola, mantenendo il cibo caldo durante i pasti. Facile da utilizzare e pulire, inoltre l'assorbimento di acqua è pari allo 0%, caratteristica che consente di mantenere invariati i sapori dei cibi serviti. Lavabile in lavastoviglie.

Consistently with the functional approach, which has always marked the brand, Paderno offers a complete product line and professional tools, easily recognizable in the kitchen, which can reduce possible mistakes during their use to protect people affected by celiac disease. Developed and realized in 2013 in collaboration with Associazione Italiana Celiachia Lombardia ONLUS (Italian Society for the Celiac Disease – Lombardy Section), this project makes Sambonet Paderno Industrie S.p.A. the first company in its market that offers to the HoReCa channel a complete line of items intended for gluten-free cooking.

Some distinguished special features, such as golden PVD handles for pans and pots and a special customised logo for utensils, will allow professionals to easily identify all these items in the kitchen.
This product line aims at:
- **Reducing the risk of accidental food cross-contamination;**
- **Making it easier for professionals to work and provide services to clients with food intollerances;**
- **Raising awareness on the gluten-free diet issue in the industry so as to respond to the new needs of consumers.**

Coerentemente all'ottica di servizio che contraddistingue da sempre il marchio, Paderno propone una linea completa di articoli e strumenti professionali facilmente identificabili in cucina, in grado di abbattere eventuali errori durante il loro utilizzo a salvaguardia del cliente celiaco e di tutti gli intolleranti. Sviluppato e concretizzato nel 2013 in collaborazione con l'Associazione Italiana Celiachia Lombardia ONLUS, questo progetto colloca Sambonet Paderno Industrie come prima azienda del settore a offrire al canale Ho.Re.Ca una linea completa di articoli da destinare alla preparazione di pietanze senza glutine.

Attraverso alcuni elementi distintivi e differenzianti, come manici in PVD oro per pentole e padelle e personalizzazione con un logo specifico per utensili, tutti gli strumenti saranno facilmente identificabili in cucina.
Questa gamma contribuisce a:
- Diminuire il rischio di accidentali contaminazioni crociate degli alimenti;
- Facilitare il professionista nell'operare e nell'offrire un servizio a favore del cliente con intolleranze alimentari;
- Sensibilizzare il settore sul tema "gluten free" di fronte alle nuove esigenze dei consumatori.

An innovative surface characterized by very hard reliefs that protect the coating with 3 times higher scratch resistance. The rough shape increases the heat exchange surface and thermal conductivity, allowing uniform cooking and energy saving. Perfect non-stick: excellent release of food during cooking and easy to clean even in the dishwasher.
Un'innovativa superficie caratterizzata da rilievi durissimi che proteggono il rivestimento con resistenza ai graffi 3 volte superiore. La conformazione rugosa aumenta la superficie di scambio e la conducibilità termica, permettendo cotture uniformi e risparmio di energia. Perfetta antiaderenza: ottimo rilascio del cibo in cottura e facile da pulire anche in lavastoviglie.

STEEL FRYING PANS
PADELLE FERRO

INDUCTION READY!

Iron is ideal for cooking at high temperatures because its low capacity of heat transmission prevents temperature leaps. As it is non-stick, food does not stick to it. It withstands very high temperatures and improves its performance with use. Iron pans are perfect for fried food, omelettes or fine crêpes. Wash the black iron pan in water as little as possible and always keep it greased. Iron pans are ideal also for cooking on induction hobs.

Il ferro è ottimo per le cotture a fuoco molto vivo perché, non avendo un'alta capacità di trasmettere calore, evita improvvisi sbalzi di temperatura. Essendo un materiale antiaderente, evita l'attaccamento dei cibi. Sopporta temperature elevatissime e col tempo migliora il suo rendimento. I recipienti in ferro sono i più adatti per fritture, omelette o sottili crêpes. La padella in ferro nera va lavata con acqua il meno possibile e mantenuta sempre unta. Il ferro è il materiale ideale anche per cotture a induzione.

ENAMELLED CAST IRON
GHISA SMALTATA

COOKWARE
PENTOLAME

INDUCTION READY!

Suitable for use on all cooking hobs (gas, electric, ceramic, induction) and ovens (gas, oil, coal or wood) except microwave. A perfect harmony of cast iron, enamel and high quality. Designed and constructed to absorb and spread the heat evenly. Cast iron is suitable for all cooking techniques, for soups, roasts, rice, desserts, for braise that require a long cooking and likewise ideal for meats and grilled vegetables as it enhances flavors and aromas like barbecue style. Cast iron also features non-stick. The high temperature of the pan sears the meat surface. All the flavor, water and nutritional values remain sealed in the food. When cooking in casseroles, the steam generated thanks to the special design of the cover condenses falling back into the food not only retaining flavors and aromas but providing the best protection for nutrients and contributing to a healthy diet. Cast iron is a material 100% recyclable and therefore environmentally friendly. Moreover, thanks to its ability to retain heat for a long time it allows a considerable saving of energy. With closed lid on the table, the pot will preserve the temperature for a second serving. Cast iron retains the heat but as well the cold... can be used to keep the food fresh. Stored for a short time in the refrigerator, keeps food cool during hot summer days, ideal for serving pasta or rice salads, etc. Practical and easy to clean. These cast iron pots and pans are dishwasher safe thanks to the special technology applied to their enameling method. Ergonomic knobs and handles made of cast iron and stainless steel, suitable for use on all heat sources and ovens except microwave. Be careful, they heat up during cooking, it is recommended to handle with a dry thick cloth.

Idonee all'uso su tutte le fonti di cottura (gas, elettriche, vetroceramica, induzione) e forni (gas, petrolio, carbone o legna) ad esclusione di microonde. Una perfetta armonia tra ghisa, smalto e alta qualità. Progettate e costruite per assorbire e diffondere il calore in modo uniforme. La ghisa è adatta a tutte le tecniche di cottura, per zuppe, arrosti, risotti, dolci, per piatti che richiedono una lunga cottura tipo brasati e allo stesso modo ideale per carni e verdure alla griglia in quanto ne esalta sapori ed aromi in stile barbecue. La ghisa ha anche caratteristiche di antiaderenza. La temperatura elevata della padella cauterizza la superficie della carne. Tutto il sapore, l'acqua e i valori nutrizionali rimangono sigillati nel cibo. Nella cottura in casseruole, il vapore generato grazie al particolare design del coperchio si condensa ricadendo e mescolandosi nuovamente nel cibo non solo trattenendo sapori e aromi ma fornendo la miglior protezione alle sostanze nutrienti e contribuendo ad una dieta sana. La ghisa è un materiale riciclabile al 100% e quindi ecologico. Inoltre, grazie alla sua capacità di mantenere il calore per lungo tempo consente un notevole risparmio di energia permettendo di cuocere a fuoco basso. Anche a tavola mantengono in cibi in temperatura. La ghisa mantiene però il caldo come pure il freddo... può essere usata per mantenere il cibo fresco. Riposta per un breve periodo in frigorifero, mantiene il cibo fresco nelle calde giornate estive e ideale per servire insalate di pasta, riso, farro, ecc., ecc. Pratica e facile da pulire. Queste casseruole e padelle in ghisa sono lavabili in lavastoviglie, per merito della speciale tecnologia applicata al metodo di smaltatura. Manicatura e pomoli dal design ergonomico sono in ghisa e inox. Durante la cottura si raccomanda di maneggiare con un panno consistente e asciutto per evitare di scottarsi.

STAMPED KNIVES
COLTELLI TRANCIATI

The professional cutlery line "Color-Line" helps to reduce the risk of cross contamination using a Color Coding System which identifies each knife with a specific task: different food processing areas are easily identified. The steel used for this cutlery line has exceptional hardness and very high resistance to corrosion due to ICE-HARDENED system, a special process to harden the steel.

La linea di coltelleria professionale "CCS"– Color Coding System riduce i rischi di contaminazione incrociata grazie all'utilizzo di un Sistema di Codifica dei Colori che identifica ogni coltello per un uso specifico e permette di individuare facilmente le diverse aree di lavoro. Gli acciai utilizzati per questa linea di coltelleria presentano un'eccezionale durezza ed elevata resistenza alla corrosione, grazie all'uso del sistema ICE-HARDENING, processo speciale per temprare l'acciaio.

JAPANESE SUSHI KNIVES
COLTELLI SUSHI GIAPPONESI

KNIVES
COLTELLERIA

Excellent choice when preparing sushi and vegetables. Molybdenum/ Vanadium s/s blades for excellent edge retention, razor sharp edges, slip resistant wooden handles. The blades are sharpened with the traditional Japanese single bevel to improve sharpness. The large beveled one-sided edge is much thinner than a two-sided edge. This thinner, sharper edge makes for cleaner cuts through the soft flesh of fish, in particular. Using these knives will avoid bruising the delicate texture of raw fish and destroying the freshness of the fish. The thinner edge is more fragile than the edge on western knives. Do not use for cutting anything solid including larger fish bones. Due to the special blade sharpening and s/s used we highly recommend to only hand wash and dry the blades thoroughly immediately.

Una scelta eccellente per la preparazione di sushi e verdure. Lame in acciaio inox, molibdeno e vanadio, per un'ottimale tenuta del filo, affilatura a rasoio, manici in legno antiscivolo. Secondo la tradizione giapponese l'affilatura è unilaterale ed il filo è molto più sottile rispetto a quello della normale affilatura dei coltelli occidentali. Questo rende i tagli più nitidi ed evita di creare traumi alla trama delicata di carne e pesce crudo. Non utilizzare per il taglio di solidi incluse grosse lische di pesce. Data la particolarità dell'affilatura e dell'acciaio impiegato si consiglia vivamente di lavare a mano ed asciugare immediatamente con cura le lame.

The Deba is a powerful knife used for filleting fish and butchering meat without bones. Its weight and thickness can chop through fish bones and the sharp edge can fillet even the smallest of fish. – Affilato e dalla lama pesante usato per disossare e tagliare il pesce utilizzato nel sushi. È simile ad un coltello da chef.

Sharp and thin, it is used by chefs in Japan for katsuramuki, a traditional style of peeling vegetables into thin sheets. –** *Doppia affilatura. The Tako Sashimi is a variation of the Yanagi and is used to slice straight-cut sashimi. The blunt tip and balanced weight works well on difficult ingredients like octopus, from which it gets its name. Originated in Kanto (Tokyo) region. – Il coltello Tako Sashimi assomiglia di più ad un coltello occidentale ed è utilizzato per affettare tagli spessi di carne per sushi. Ha la lama senza punta, per evitare di rovinare i tentacoli del polpo.

The Yanagi Sashimi is a slicing knife used to cut boneless fish fillets into sashimi and topping for sushi. The graceful, thin blade cuts beautiful slices in one long, drawing stroke. Originated in Kansai (Osaka) region. – Viene utilizzato per tagliare sottili fette di verdure, carne o pesce, nonchè per tagliare in generale a dadi o a fette. Grazie alla sua lama sottile ed affilata è utilizzato anche per creare guarnizioni o tagliare i rotoli di sushi.

Ideal for baking all leavened pastries, but also shortcrust pastry and meringues, it guarantees perfect baking in less time than traditional baking paper. Thanks to the micro-perforation, steam escapes faster during baking. This ensures a better passage of air, which also cools the products faster than with conventional baking paper.
Ideale per la cottura di tutte le paste lievitate, ma anche di bignè, pasta frolla, biscotti, pasta sfoglia e meringhe. Garantisce una cottura perfetta in minor tempo rispetto alla carta forno tradizionale. Durante la cottura, la microforatura permette al vapore acqueo di fuoriuscire più velocemente garantendo così un miglior passaggio dell'aria. Anche il raffreddamento dei prodotti è più rapido.

MICROPERFORATED CAKE RINGS
FASCE MICROFOFORATE

SS

The micro-holes allow to support the edges of the cake avoiding to collapse during cooking. They also allow to expel the moisture from the dough, obtaining a perfect and always crispy cooking.

I microfori permettono di sostenere i bordi della torta evitandone il collasso in cottura. Consentono inoltre di espellere l'umidità, ottenendo una cottura sempre perfetta e croccante.

NON STICK CAKE MOLDS
TORTIERE ANTIADERENTI

PASTRY
PASTICCERIA

Wash the mold before the first use. Slightly grease inside surface with oil, butter or margarine before baking. Allow cake to cool down a little before removing from the mold. For the cleaning, hand-wash with dish soap and dry the mold immediately after washing. Use only in traditional ovens (no microwave). Do not use sharp objects or others metal tools which could damage the pan surface. Do not use on a flame or other direct heat source, including stove tops. Do not exceed 230°C. Non-stick coating PFOA free.

Lavare lo stampo prima di utilizzarlo la prima volta. Ungere leggermente l'interno con olio, burro o margarina prima di infornare. Prima di sformare, lasciare raffreddare per qualche minuto. Lavare a mano con detersivi liquidi ed asciugare lo stampo immediatamente dopo. Utilizzare esclusivamente in forni tradizionali (no microonde). Non utilizzare oggetti appuntiti, polveri abrasive o pagliette metalliche che possano rigare la superficie degli stampi. Evitare il contatto con fonti di calore dirette o fiamma libera. Non superare la temperatura massima di 230°C. Rivestimento antiaderente privo di PFOA.

SERIES LEVANTE

SS

Levantine cuisine served appropriately. Lots of vegetables, little meat and a variety of spices characterize the cuisine of the Middle East. The eastern Mediterranean region, i. e. Syria, Lebanon, Jordan, Israel and Palestine are referred to as the Levant. The food tradition of these countries are celebrated as a food trend.

Cucina levantina servita in modo appropriato. Tanta verdura, poca carne e una varietà di spezie caratterizzano la cucina del Medio Oriente. Le regioni del Mediterraneo orientale, come Siria, Libano, Giordania, Israele e Palestina sono indicati come Levante. Le tradizioni alimentari di questi paesi vengono celebrate come tendenza.

BLACK & BROWN
NERO & MARRONE

The rough surface structure creates a natural appearance. The black bowls and trays with brown border stage your dishes in a very stylish way.

La struttura superficiale ruvida crea un aspetto naturale. Le ciotole e i vassoi neri con bordo marrone mettono in scena le pietanze in modo molto elegante.

FLAX SEED

PEPPER
Made of case-hardened steel for higher, more consistent output with fewer turns. Equipped with a helix-shaped double row of teeth that guide and hold the peppercorns for a perfect grind. The grind is essential for unlocking the full flavour of your pepper. To get the best out of your pepper grinding mechanism, we recommend to use peppercorns with a diameter of 6 mm or less. Black, white and dry green peppercorns can be ground in Peugeot pepper mills. The pink berries can be ground only if in a blend (max 15% pink) with one of these peppercorns. Dried coriander is also suitable for the pepper mechanism.

DRY SALT
The Peugeot salt mechanism is designed to grind cooking salt (rock salt). It is made of a special stainless steel that resists corrosion. Its shape is specifically adapted to transform dry salt crystals to a fine powder. To get the best out of your Peugeot salt grinding mechanism, you should use salt with a size of 4 mm max.

WET SEA SALT
For wet sea salt, a specially designed mechanism has been created because the natural consistency and moisture content do not allow the use of an ordinary salt mill. An innovative patented system enables a high-performance grind without blockage even with very humid or compressed salt. This specific mechanism is composed of 3 fins ensuring both resistance and constant output, and of an spiral that mixes the salt and guides it, ensuring a constant flow. Exclusive ceramic mechanism.

NUTMEG
The Peugeot nutmeg mill is equipped with a double stainless steel blade/grater and a strong claw which enables the nutmeg to be very finely ground.

CHILI PEPPER
The chili pepper mechanism is a Peugeot exclusive product. This patented model has a pre-cutting system and a mechanism that grinds dry chili pepper. Like the pepper grinder it has a patented treatment that protects the steel from corrosion while maintaining its sharpness and wear resistance.

PEPE
Realizzato in acciaio, beneficia di un trattamento che lo protegge dalla corrosione, conserva il potere tranciante e lo rende resistente all'usura. Dotato di una doppia fila di denti elicoidali che guidano i grani di pepe verso il basso. Trancia e non schiaccia i grani, per sprigionarne sottilmente sapore e profumo. Consigliamo di utilizzare grani di pepe con un diametro di 6 mm o meno. I grani di pepe neri, bianchi e verdi secchi possono essere macinati nei macinapepe Peugeot. Le bacche rosa possono essere macinate solo se in miscela (max 15% rosa). Il meccanismo del pepe è adatto anche al coriandolo essiccato.

SALE SECCO
Il meccanismo del sale è progettato per macinare il sale da cucina (sale grosso). È fatto di uno speciale acciaio inossidabile resistente alla corrosione. La sua forma è specificamente adattata per trasformare cristalli di sale secco in una polvere fine. Per un risultato ottimale si consiglia di usare sale con una dimensione di 4 mm max.

SALE MARINO UMIDO
Per il sale marino umido, è stato creato un meccanismo apposito. Un innovativo sistema brevettato consente una macinatura ad alte prestazioni senza ostruzioni anche con sale molto umido o compresso. Il meccanismo è composto da 3 alette che ne garantiscono sia la resistenza sia un rendimento costante, e di una spirale che mescola il sale e lo guida assicurandone un flusso costante. Meccanismo esclusivo in ceramica.

NOCE MOSCATA
La macina è dotata di una doppia lama per grattugiare in acciaio inox e di un robusto dischetto uncinato che permette di grattugiare l'intera noce molto finemente.

PEPERONCINO
Questo meccanismo è un prodotto esclusivo Peugeot. Il modello brevettato ha un sistema di pre-taglio e un meccanismo che permettono di macinare il peperoncino essiccato. Come il macinapepe, il meccanismo subisce un trattamento brevettato che protegge l'acciaio dalla corrosione pur mantenendo la sua affilatura e resistenza all'usura.

ADJUSTABLE GRINDING SYSTEM
For electric or manual mills.
Patented precision system that enables precise grind adjustment settings. 6 pre-defined levels of grind for pepper and 6 for salt. Rotate the ring at the base of the mill and select one of the positions, each corresponding to a specific grain.

REGOLAZIONE DELLA MACINA
Per macine manuali ed elettriche.
Sistema brevettato che permette una regolazione predefinita della macinatura. 6 Livelli per il pepe e 6 Livelli per il sale. Ruotare l'anello alla base della macina e selezionare una delle posizioni, ognuna corrisponde ad una determinata grana.

U SELECT
MOUTURE SUR MESURE

CLASSIC ADJUSTABLE SYSTEM
Thumbwheel grind adjustment on electric grinders is found below the grinding mechanism. Grind adjustment nut on manual mills, turn the nut. Clockwise to obtain a finger grind, counter-clockwise to obtain a coarser grind.

REGOLAZIONE CLASSICA
Negli apparecchi elettrici la rotella di regolazione si trova sotto il meccanismo di macinatura. Negli apparecchi manuali la regolazione si effettua ruotando il dado/pomolino. Ruotare in senso orario per ottenere una macinatura più fine, in senso antiorario per ottenere una macinatura più grossa.

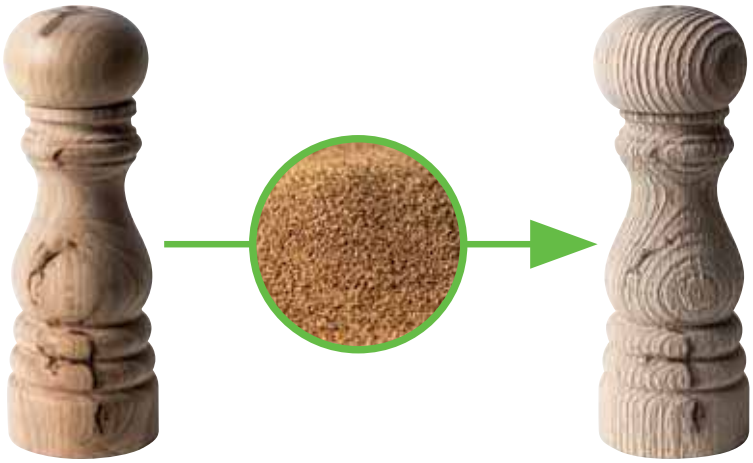
NATURE & NATURE BLACK
UPCYCLING PROCESS / PROCESSO DI RIUTILIZZO

SORTING SELEZIONE 1

DISCARDED WOOD
Knots and differences in grain colour are inherent in the tree's growth and represent the very nature of the wood.

LEGNO SCARTATO
Nodi e differenze di grana di colore sono intrinseche nella crescita dell'albero e rappresentano la vera natura del legno.

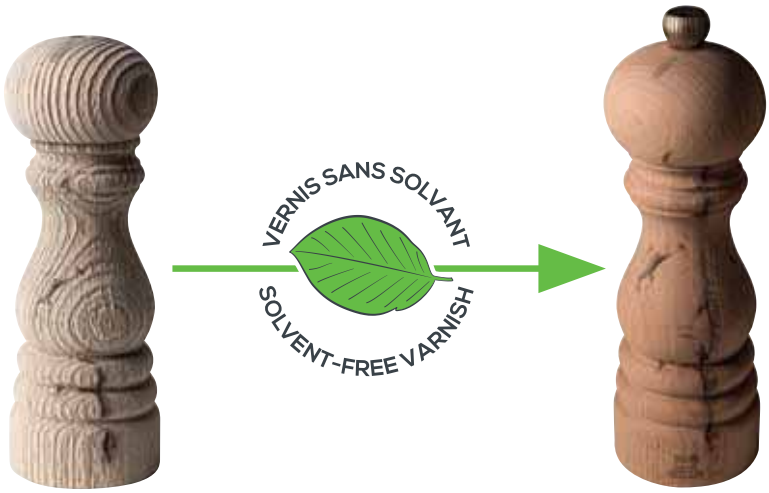
BLASTING SABBIATURA 2



NEW LEASE OF LIFE
The sandblasting process gives the mills a strong look with their original irregular finish.

NUOVA VITA
Il processo di sabbiatura con la finitura irregolare e originale conferisce alle macine un carattere forte.

VARNISHING VERNICIATURA 3



Protection with a solvent-free varnish for everyday use while locking in the wood's natural character.

Una vernice senza solventi rende le macine idonee all'uso quotidiano, pur mantenendo il carattere naturale del legno.

This collection is created from wooden pieces that are discarded at different stages of our manufacturing process (after turning, or after being painted). In order to recycle these pieces and give them a new lease of life, Peugeot carries out a mechanical sandblasting. This is what gives these mills their unusual and irregular texture, endowing them with such a striking organic look. A solvent-free varnish is then applied to protect the wood ensuring its longevity and resistance for lasting daily use. NATURE BLACK comes to life from pieces of wood recycled after painting in the famous chocolate finish. The sandblasting process creates a unique relief that is enhanced by applying a solvent-free matte black paint. The paint together with the texture create an interaction of light with opaque and glossy reflections, instilling its uniqueness in the millstone. A unique play of light, a mix of texture and color.

La collezione NATURE è creata con pezzi di legno che venivano scartati nelle diverse fasi del processo produttivo (dopo la tornitura o dopo la verniciatura). Riprendono ora vita mettendo in mostra le qualità intrinseche del legno. Il processo di sabbiatura con la finitura irregolare e originale conferisce alle macine un carattere forte e dal sorprendente aspetto organico. Ogni pezzo diventa singolare e unico. Una vernice senza solventi protegge il legno garantendone la longevità e la resistenza all'uso quotidiano. NATURE BLACK prende vita da pezzi di legno riutilizzati dopo la verniciatura nella famosa finitura cioccolato. Il processo di sabbiatura crea un rilievo unico che viene esaltato mediante l'applicazione di una vernice nera opaca priva di solventi. La vernice unitamente alla texture, creano un'interazione di luce con riflessi opachi e lucidi instillando nella macina la sua singolarità. Un gioco di luci unico, un mix di texture e colore.

With the range of Appolia vitrified enamel ceramics, Peugeot demonstrates its know-how and expertise in the field of oven dishes.

It is in France, in the heart of Brittany, in its ceramic factory founded more than 80 years ago, that Peugeot produces Appolia products. The workshop has awarded the EPV label "Entreprise du Patrimoine Vivant" - a sign of recognition by the State that distinguishes French companies with excellent craftsmanship and industrial know-how.

A noble material, Peugeot ceramic guarantees regular and homogeneous cooking for a healthy and tasty cuisine. A well-kept secret, the recipe for ceramic paste, a mix of clay, kaolin and feldspar, gives the product a remarkable resistance to mechanical shocks.

Simple and contemporary lines, Appolia has been designed to offer practicality and express flavors.

Con la gamma di ceramiche smaltate Appolia, Peugeot dimostra il suo know-how e la sua competenza nel campo delle pirofile da forno.

È in Francia, nel cuore della Bretagna, nella sua manifattura di ceramica fondata da più di 80 anni, che Peugeot produce i prodotti Appolia. L'officina è stata premiata con l'etichetta EPV "Entreprise du Patrimoine Vivant" - un segno di riconoscimento da parte dello Stato che distingue le aziende francesi con un eccellente know-how artigianale e industriale.

Un materiale nobile, la ceramica Peugeot garantisce una cottura regolare e omogenea per una cucina sana e gustosa. Un segreto ben custodito, la ricetta della pasta ceramica, un mix di argilla, caolino e feldspato, conferisce al prodotto una notevole resistenza agli urti meccanici.

Linee pulite e contemporanee, Appolia è stata progettata per offrire praticità ed esprimere i sapori.

Appolia dishes are suitable for use in the oven (250°C), microwave, freezer (-20°C). Dishwasher safe. Produced with 100% natural ingredients (mixture of clays, kaolin, silica, feldspar), 100% recyclable. They guarantee a delicate and tasty, healthy and homogeneous cooking. They have exceptional thermal inertia: they retain heat for up to 30 minutes - they help keep food hot or cold. The material is not porous, does not absorb odors, greases or liquids. The hardness of the final product gives the oven dishes a high mechanical resistance to shocks, scratches and acids. The resistance of Peugeot vitrified enamel has been tested by an independent laboratory. Easy to clean with a simple sponge. Long-lasting color and shine. Comfortable and easy to use, wide and striped handles for a secure grip; rounded corners, facilitate service and cleaning; deep, they offer more volume; allow the retention of cooking juices in order to preserve all the flavors, they are stackable one inside the other to save space. A collection for every day, beautiful, durable and versatile from the kitchen to the table. Available in 6 colors: red, ecru, blue - timeless and essential shades; slate, eggplant, terracotta - contemporary and chic shades.

Le pirofile Appolia sono idonee all'uso in forno (250°C), microonde, congelatore (-20°C). Lavabili in lavastoviglie. Prodotte con ingredienti naturali al 100% (miscela di argille, caolino, silice, feldspato), 100% riciclabili. Garantiscono una cottura delicata e gustosa, sana e omogenea. Hanno eccezionale inerzia termica: trattengono il calore fino a 30 minuti - aiutano a mantenere il cibo caldo o freddo. Il materiale non è poroso, non assorbe odori, grassi o liquidi. La durezza del prodotto finale conferisce alle pirofile un elevata resistenza meccanica agli urti, graffi e acidi. La resistenza dello smalto vetrificato di Peugeot è stata testata da un laboratorio indipendente. Facile da pulire con una semplice spugna. Colore e brillantezza di lunga durata. Comode e facili da usare, maniglie larghe e striate per una presa sicura; angoli arrotondati, facilitano il servizio e la pulizia; profonde, offrono più volume; consentono la ritenzione dei succhi di cottura in modo da preservare tutti i sapori, sono impilabili l'una nell'altra per un risparmio di spazio. Una collezione per tutti i giorni, bella, durevole e versatile dalla cucina alla tavola. Disponibile in 6 colori: rosso, ecru, blu - tonalità senza tempo ed essenziali; ardesia, melanzana, terracotta - tonalità contemporanee e chic.

POLYPROPYLENE CONTAINERS
CONTENITORI POLIPROPILENE

PPE

Made of expanded polypropylene (PPE), suitable for protecting food from thermal stress thanks to the insulating properties of the expanded polymer which guarantees a thermal drop compliant with the UNI EN 12571:1999 standard. Polypropylene is expanded with CO2, without CFCs and HCFCs, and has no residual blowing agents. It has a closed cell structure which gives it excellent characteristics of energy dissipation in impacts and specific thermal resistance. Expanded Polypropylene is mainly composed of air (in relation to density it can reach 98% of air) and only 2% of pure hydrocarbon structural material, it is 100% recyclable and in infinite cycles without releasing residues into the environment or losing its chemical-physical characteristics.

Realizzati in polipropilene espanso (PPE), idonei a proteggere gli alimenti da sollecitazioni termiche grazie alle proprietà coibentanti del polimero espanso che garantisce una caduta termica conforme alla norma UNI EN 12571:1999. Il polipropilene è espanso con CO2, senza CFC e HCFC, e non ha agenti di espansione residui. Ha una struttura a celle chiuse che gli conferisce eccellenti caratteristiche di dissipazioni di energia negli urti e di resistenza termica specifica. Il Polipropilene Espanso è composto prevalentemente da aria (in relazione alla densità può raggiungere il 98% di aria) e solo dal 2% di materiale strutturale di puro idrocarburo, è riciclabile al 100% e a cicli infiniti senza rilascio di residui nell'ambiente o perdita di caratteristiche chimico-fisiche.
